2. INTRODUCTION

This document contains information about the progress of work on the documentation. The purpose of the document is to support work on adapting the exchange members' systems to GPW WATS.

2.1. WORK PROGRESS

This section presents the progress of work of each document.

The progress is indicated on a three-level scale:

- Low - significant work is planned in the given area
- Medium - over 50% content has already been realized in the given area
- High - over 80% of the content has already been realized in the given area.

3. GPW WATS 1.01 TRADING SYSTEM ADVANCEMENT

3.1. OVERVIEW OF THE DOCUMENT STATUS

The specification of GPW WATS 1.01 Trading System, although not the final version, is currently in a highly and advanced state. The majority of topics have been already addressed, however it may be expected that some minor changes may appear in the future.

Some of the topics are in a development phase and their progress will be announced in due course. The market model for Hybrid instruments is currently under review and it is expected that the final version will be announced Q1 2024.

3.2. WORK PROGRESS

Section	Title	Advancement	Description
4.0	GPW WATS Services (Interfaces)		Work progress of the document GPW WATS 1.01 Trading System v0.57, addressing separate services, applies only to the content of the description of in this document. The individual assessment of a given service may therefore be different, as the documents describing particular services are much more detailed. The final advancement rating for a specific service is described in the dedicated document for the scope.
4.1	Users	High	The section describes the subject that has been implemented.
4.2	Order Gateways	High	The section describes the subject that has been implemented.
4.3	Market Data Gateway	High	The section describes the subject that has been implemented.
4.4	Fix Drop Copy Gateway	High	The section describes the subject that has been implemented.
4.5	FIX Post-Trade Gateway	High	The section describes the subject that has been implemented.
4.6	FIX CCP Gateway	High	The section describes the subject that has been implemented.
4.7	Additional Functionalities		
4.7.1	Risk Management	High	The section describes the subject that has been implemented.
4.7.2	Self – Trade Prevention	High	The section describes the subject that has been implemented.
4.8	Connectivity		
4.8.1	Cancel on Disconnect	High	The section describes the subject that has been implemented.
4.8.2	Throttling	High	The section describes the subject that has been implemented.
5	Market Structure		
5.1.	Market	High	The section describes the subject that has been implemented.
5.2.	Market Segments	High	The section describes the subject that has been implemented.
5.3.	Product	High	The section describes the subject that has been implemented.
5.4.	Instrument	High	The section describes the subject that has been implemented.
5.5.	Instrument States	High	The section describes the subject that has been implemented. However it may be expected that additional Instrument States appear in the future.

Section	Title	Advancement	Description
6.	Trading Parameters		
6.1.	Trading Calendar	High	The section describes the subject that has been implemented.
6.2.	Trading Schedule	High	The section describes the subject that has been implemented.
6.3.	Price	High	The section describes the subject that has been implemented.
6.4.	Tick Size	High	The section describes the subject that has been implemented.
6.5.	Lot Size	High	The section describes the subject that has been implemented.
6.6.	Trading Currency	High	The section describes the subject that has been implemented.
6.7.	Corporate Actions	High	The section describes the subject that has been implemented.
7.	Settlement and Clearing Parameters		
7.1.	Settlement Calendar	High	The section describes the subject that has been implemented.
7.2.	Settlement Cycle	High	The section describes the subject that has been implemented.
7.3.	Clearing Data	High	The section describes the subject that has been implemented.
8.	Central Limit Order Book Model		
8.1.	Market Phases	High	The section describes the subject that has been implemented. However it may be expected that additional Market Phases appear in the future.
8.2.	Orders	High	The section describes the subject that has been implemented.
8.3.	Matching Algorithms	High	The section describes the subject that has been implemented.
8.4.	Pre-Trade Controls	High	The section describes the subject that has been implemented.
8.5.	Circuit Breakers	High	The section describes the subject that has been implemented.
9.	Off-Book Trading Models		
9.1.	Off-Book Trading	High	The section describes the subject that has been implemented.
9.2.	Block Trading Model	High	The section describes the subject that has been implemented.
9.3.	Cross Trading Model	High	The section describes the subject that has been implemented.
9.4.	Market Phases	High	The section describes the subject that has been implemented.
9.5.	Trade Capture Reports	High	The section describes the subject that has been implemented.
9.6.	Pre-Trade Controls	High	The section describes the subject that has been implemented.
10.	Hybrid Model	Low	Significant work is planned in the given area.
10.1.	Order Types	Low	Significant work is planned in the given area.
10.2.	Validity Conditions (TIF)	Low	Significant work is planned in the given area.
11.	IPO/SPO Model		
11.1.	IPO/SPO Market Segments	High	The section describes the subject that has been implemented.

Section	Title	Advancement	Description
11.2.	IPO/SPO Order Type	High	The section describes the subject that has been implemented.
11.3.	IPO/SPO Validity Conditions (TIF)	High	The section describes the subject that has been implemented.
11.4.	IPO/SPO Compatibility Matrix	High	The section describes the subject that has been implemented.
12.	Tender Offer Model		
12.1.	Tender Offer Market Segment	High	The section describes the subject that has been implemented.
12.2.	Tender Offer Order Type	High	The section describes the subject that has been implemented.
12.3.	Tender Offer Validity Conditions (TIF)	High	The section describes the subject that has been implemented.
12.4.	Tender Offer Compatibility Matrix	High	The section describes the subject that has been implemented.
12.5.	Tender Offer Process	High	The section describes the subject that has been implemented.

4. GPW WATS 2.01 NATIVE ORDER GATEWAY SPECIFICATION ADVANCEMENT

4.1. OVERVIEW OF THE DOCUMENT STATUS

The specification of Native Order Gateway, despite not being the final version, is currently in a highly advanced state. Compared to the previous version of the documentation (i.e. version 0.51), the changes are minor. Almost none of the key messages used for placing orders has been altered. In the messages OrderAdd, OrderAddResponse, OrderCancel, OrderCancelResponse, OrderModify, and OrderModifyResponse, which altogether contain 42 fields, only one field, 'memo', has been added, as requested by Exchange Members (following consultations). The latest version has been slightly updated and it contains new functionality related to quotes, hence 2 new messages MassQuote and MassQuoteResponse have been added.

4.2. WORK PROGRESS

Section	Title	Advancement	Description
4.1.	Native Service Description	High	The section describes the subject that has been implemented.
4.2.	Conditionally Required Fields	High	The section describes the subject that has been implemented.
4.3.	Security Identification	High	The section describes the subject that has been implemented.
4.4.	Order Management	High	The section describes the subject that has been implemented but order sources and statuses could be extended, in particular due to requests from exchange members regarding order states (i.e. information about new aggressive order) .
4.5.	Trade Capture	High	The section describes the subject that has been implemented.
4.6.	Quote Handling	Medium	The section describes the subject that has been implemented but quotations is a new feature, hence potential improvements are assumed .
4.7.	Cancel On Disconnect	High	The section describes the subject that has been implemented.
4.8.	Reject Messages	High	The section describes the subject that has been implemented.
4.9.	Timestamps And Dates	High	The section describes the subject that has been implemented.
5.1.	Session Identification	High	The section describes the subject that has been implemented.
5.2.	Failover And Recovery	Medium	The section describes the subject that has been implemented but adaptation to the new infrastructure is planned.
5.3.	Message Throttling	High	The section describes the subject that has been implemented.
5.4.	Connectivity Policy	N/A	N/A
6.	Session Layer	High	The section describes the subject that has been implemented.
7.	Messages	High	The section describes the subject that has been implemented however, some implementation details may still change. This includes changes resulting from the demands of the Exchange

Section	Title	Advancement	Description
			Members, similar to those mentioned in the chapter 4.4. Additional fields may be added due to the implementation of new market models, but the main messages are currently characterized by high stability.
8.	Message Kinematics	High	Description as above.

5. GPW WATS 2.02 FIX ORDER GATEWAY SPECIFICATION ADVANCEMENT

5.1. OVERVIEW OF THE DOCUMENT STATUS

The specification of FIX Order Gateway, despite not being the final version, is currently in a highly advanced state. Compared to the previous version of the documentation, the changes are minor. Almost none of the key messages used for placing orders has been altered. The latest version has been slightly updated and it contains new functionality related to quotes, hence 2 new messages Mass Quote (I) and Mass Quote Ack (B) have been added.

5.2. WORK PROGRESS

Section	Title	Advancement	Description
4.	Service Description		The section describes the subject that has been implemented.
4.1.	Fix Gateway Service Description	High	The section describes the subject that has been implemented.
4.2.	Party Identifiers	High	The section describes the subject that has been implemented.
4.3.	Security Identification	High	The section describes the subject that has been implemented.
4.4.	Order Management	High	The section describes the subject that has been implemented.
4.5.	Trade Capture Reports	High	The section describes the subject that has been implemented.
4.6.	Quote Handling	Medium	The section describes the subject that has been implemented but quotations is a new feature, hence potential improvements are assumed.
4.7.	Cancel On Disconnect	High	The section describes the subject that has been implemented.
4.8.	Reject Messages	High	The section describes the subject that has been implemented.
5.	Connectivity	High	The section describes the subject that has been implemented.
5.1.	Session Identification	High	The section describes the subject that has been implemented.
5.2.	Failover and Recovery	Medium	The section describes the subject that has been implemented but adaptation to the new infrastructure is planned.
5.3.	Message Throttling	High	The section describes the subject that has been implemented.
5.4.	Connectivity Policy	N/A	N/A
6.	Session Layer	High	The section describes the subject that has been implemented.
6.1.	Establishing a FIX Connection	High	The section describes the subject that has been implemented.
6.2.	Maintaining a FIX Session	High	The section describes the subject that has been implemented.

Section	Title	Advancement	Description
6.3.	Terminating a Fix Connection	High	The section describes the subject that has been implemented.
6.4.	Re-establishing a Fix Session	High	The section describes the subject that has been implemented.
6.5.	Recovery	High	The section describes the subject that has been implemented.
7.	Messages	High	The section describes the subject that has been implemented.
8.	Message Kinematics	High	The section describes the subject that has been implemented.
8.1.	Clob	High	The section describes the subject that has been implemented.
8.2.	Off-Book (Block or Cross)	High	The section describes the subject that has been implemented.

6. GPW WATS 2.03 REJECTION CODES ADVANCEMENT

6.1. OVERVIEW OF THE DOCUMENT STATUS

Rejection codes for Central Limit Order Book (CLOB) and Off-Book Trading (both Block and Cross) market models have already been implemented, although some minor changes/enhancements may still be expected.

Rejection codes for Hybrid Market, IPO, Tender Offer and Risk Management are currently under development and the full list will be provided at later stage.

6.2. WORK PROGRESS

Section	Title	Advancement	Description
5.	Rejection Codes	Medium	
5.1.	Central Limit Order Book	High	The section describes the subject that has been implemented.
5.2.	Off-Book Trading	High	The section describes the subject that has been implemented.
5.3.	Hybrid Market	Low	The list of codes will be provided in the future release of this document.
5.4.	IPO	Low	The list of codes will be provided in the future release of this document.
5.5.	Tender Offer	Low	The list of codes will be provided in the future release of this document.
5.6.	Risk Management	Medium	The list of codes is under preparation and will be provided in the future release of this document.

7. GPW WATS 2.04 BENDEC MESSAGE DEFINITION FORMAT ADVANCEMENT

7.1. OVERVIEW OF THE DOCUMENT STATUS

GPW WATS 2.04 BenDec Message Definition Format is in an advanced state of completion. No or minor changes are planned for this document in terms of content.

7.2. WORK PROGRESS

Section	Name	Advancement	Description
4.	BenDec Messages Definition Format	High	The section describes the subject that has been implemented.
4.1.	Message Union	High	The section describes the subject that has been implemented.
4.2.	Msgtype Enumeration	High	The section describes the subject that has been implemented.
4.3.	Primitive Types	High	The section describes the subject that has been implemented.
4.4.	Aliases	High	The section describes the subject that has been implemented.
4.5.	Arrays	High	The section describes the subject that has been implemented.
4.6.	Enumerations	High	The section describes the subject that has been implemented.
4.7.	Structures	High	The section describes the subject that has been implemented.
5.	Protocol Definition - Primitives	High	The section describes the subject that has been implemented.

8. GPW WATS 3.01 MARKET DATA ADVANCEMENT

8.1. OVERVIEW OF THE DOCUMENT STATUS

The Market Data protocol is in an advanced state of completion and most messages are expected to remain stable. The few messages which are being worked on are highlighted in the section below.

8.2. WORK PROGRESS

Section	Section Name	Advancement	Description
4	GPW Wats Market Data	High	
5	Real Time Flow in Market Data	Medium	The flow of Market Data messages across phases during the trading day will be added to this chapter.
6	Trading Messages		
6.1	Auctions	Medium	Additional order book events may be implemented in the future.
6.2	Full Depth Order Messages	High	
6.3	BBO Messages	High	
6.4	Status Messages	High	
6.5	Summary Messages	Low	The InstrumentSummary and SessionSummary messages carry statistical payload and will be modified in the future to include new information.
7	Reference Data Messages		
7.1	Market Structure Messages	High	
7.2	Trading Calendar Messages	High	
7.3	Order And Trade Collars	High	
7.4	Pricing Messages	High	
8	Index Messages	High	
9	Session Management Messages	Medium	Messages about trading session events will be added to session management messages..

9. GPW WATS 4.01 DROP COPY GATEWAY ADVANCEMENT

9.1. OVERVIEW OF THE DOCUMENT STATUS

Please be ensured that the evaluation process of the document GPW WATS 4.01 Drop Copy Gateway does not represents the final status. To the present day the document describes the main role of the Drop Copy Service and business context. It also provides the information about the configuration and connection. The document explains how the Drop Copy Service operates within the System. The newest version has been slightly updated.

9.2. WORK PROGRESS

Section	Name	Advancement	Description
4.0	Service Description		
4.1	Drop Copy Gateway Service Introduction	High	The section describes the subject that has been implemented.
4.2	Drop Copy Gateway Information Scope	High	The section describes the subject that has been implemented.
4.3	Parties	High	The section describes the subject that has been implemented.
5.0	Drop Copy Configuration		
5.1	Connection Information	High	The section describes the subject that has been implemented.
5.2	Service Configuration	High	The section describes the subject that has been implemented.
5.3	Failover And Recovery	Medium	The subject under consideration and development.
6.0	Session Layer		
6.1	Drop Copy Session Messages	High	The section describes the subject that has been implemented.
7.0	Application Layer		
7.1	Drop Copy Gateway Application Messages	High	The section describes the subject that has been implemented.
7.2	Behavior Model	High	The section describes the subject that has been implemented.
8.0	Message Formats		

10. GPW WATS 4.02 Post Trade Gateway ADVANCEMENT

10.1. OVERVIEW OF THE DOCUMENT STATUS

To begin with the evaluation process of the document GPW WATS 4.02 Post Trade Gateway the minority changes have been included into the content. The document provides significant information about Post Trade Gateway with respect to the business scenarios. It also gives an overview on messages and communication layer.

10.2. WORK PROGRESS

Section	Section Name	Advancement	Description
4.0	Service Description		
4.1	Post Trade Gateway Introduction	High	The section describes the subject that has been implemented.
4.2	Usage Scenarios	High	The section describes the subject that has been implemented.
5.0	Supported Message Types		
5.1	Session Layer	High	The section describes the subject that has been implemented.
5.2	Application Layer	High	The section describes the subject that has been implemented.
5.3	Service Desk Procedure	Low	The content will be changed. It depends on the organizational changes.
5.4	Trade Capture Report (AE) for Post Trade Gateway	Medium	The subject under consideration and development.

11.GPW WATS 5.01 RISK MANAGEMENT ADVANCEMENT

11.1. OVERVIEW OF THE DOCUMENT STATUS

The Risk Management Gateway is in an advanced state of completion and most messages are expected to remain stable. The few messages which are being worked on are highlighted the section below.

11.2. WORK PROGRESS

Section	Section Name	Advancement	Description
4	GPW WATS Risk Management Gateway	Medium	The presentation of the system will be updated as work on the system development progresses.
5	Pre-Trade Risk Controls	High	
6	Post-Trade Risk Controls	Medium	Post trade risk controls are being analyzed and new control mechanisms are developed and will be included in future versions.
7	General Considerations	Medium	This section describes elements of the general functioning of the system and will be updated to reflect the state of the system.
8	RM Protocol	Medium	The RM FIX protocol may be subject to updates. The related message examples may also be modified in accordance to changes in protocol messages.
