1. DISCLAIMER

This document is for information purposes only and does not form any part of contractual documentation.

Reasonable care has been taken to ensure details contained within are accurate and not misleading at the time of publication. Warsaw Stock Exchange is not responsible for any errors or omissions contained in this document.

Warsaw Stock Exchange reserves the right to treat information contained in this document subject to later change without prior notice.

This document contains confidential information to Warsaw Stock Exchange and may not be reproduced, disclosed, or used in whole or part, in any manner, without prior written consent from the owner of this document. Information included in this document shall be maintained and exercised with adequate security measures necessary to protect confidential information from unauthorized access or disclosure.

In case of sections of documentation at a **High** level work progress according to the current version of *GPW WATS Advancement of Documentation*, Warsaw Stock Exchange will endeavor to limit changes to these sections of documents to those related to:

1. correcting errors in the documentation or in the software;
2. clarification of the documentation content or removing ambiguity;
3. implementation of approved change requests or;
4. regulatory changes.

2. PREFACE

This section describes the basic information about Short Long Mapper. You can learn about the target audience, the document purpose and all the necessary documents you should read in relation to this document.

2.1. TARGET AUDIENCE

This document is dedicated Exchange Members who uses SLM system.

2.2. DOCUMENT'S PURPOSE

This document presents all adjustments that has been made in the newest release. The document is always compared with its previous version. Comparison of format changes is not included for readability purposes.

2.3. ASSOCIATED DOCUMENTS

Please, check the SLM documentation:

- GPW WATS 6.02.01 Short Code Record Keeping

Please, check the documentation of the trading protocols supported by GPW WATS.

- GPW WATS 2.01 Native Order Gateway Specification,
- GPW WATS 2.02 FIX Order Gateway Specification.

3. DOCUMENT HISTORY

Version	Date	Description
0.61	29.02.2024	Initial publication of the document.
0.62	25.03.2024	Publication of v0.62. No changes in this version.

4. INTRODUCTION

4.1. ABOUT THE SERVICE

In order to comply with Article 2(1) of the Commission Delegated Regulation (UE) 2017/580 of 24 June 2016 (Regulation), the Warsaw Stock Exchange (GPW) are obliged to obtain the following data from customers:

- Client,
- Investment decision within firm,
- Execution within firm,
- Non-executing broker.

Due to the fact that some of data might be classified as personal and sensitive data (including Nationals ID codes) it is not desirable to use it with every order. Providing this data on the order level may negatively impact message bandwidth. Hence to address both requirements, Exchange Members are required to:

- use in order message so called Short Codes allowing to identify each of the above mentioned categories using separate mapping process,
- provide to the Warsaw Stock Exchange mapping of Short Codes used in orders and additionally supply the mapped Long Codes.

4.2. TECHNICAL REQUIREMENTS

In order to set up a correct session, a computer with Internet access is required.

- Windows 7, 10 - Internet Explorer (v.11 or higher)/Chrome (v.51 or higher)/Opera (v.37 or higher).

Due to security precautions, the maximum amount of time after which the system automatically disconnects from the session is limited to 2 hours. The remaining time until session disconnection is always visible on the top-middle label of the screen.

4.3. BEFORE STARTING

~~To obtain access to the Short Long Mapper service and to upload file with short code—long code mapping is required to send to WSE signed list of authorised persons.~~

It is required to send to WSE signed list of authorized persons to obtain access to the Short Long Mapper service and to upload file with short code—long code mapping.

4.4. CONTACT

Short Long Mapper Support:

- Email: wsparcieUTP@gpw.pl

- Tel: +48 22 537 73 41

GPW contact details are always displayed at the bottom of the screen.

Upload time in this column you can check at which time you uploaded your files

User list here you can see who uploaded files

File name uploaded files are listed right here, you can track version number with this column

Status this section displays results from uploaded files

Details by clicking one of those icons you can download uploading report or list details what

More details regarding WSE „Short-Long Mapping” you will find in the following specifications :

- SLM_Short_Long_Mapper_user_guide_1.5
- Short code_record keeping V.10

The screenshot displays the GPW Short-Long Mapper web application. The interface includes a top navigation bar with the GPW logo and the title 'Short-Long Mapper'. On the right side of the header, it shows the session expiration time ('Session expires in 00:43'), the user name ('Artur Kielak (GPW)'), and a language selector (Polish flag).

The main content area is divided into several sections:

- Reporting time:** A reminder showing the current session date (2024-01-29).
- Send file:** A section for uploading files to the mapping database. It features a 'CHOOSE FILE' button, a text input field, and a 'Send' button. Below the input field, an example filename is provided: 'XCCCCYYYYMMDDVV.csv.pgp', where X is the trading platform, CCCC is the exchange member code, YYYYMMDD is the effective date, and VV is the version number.
- Upload history:** A table listing uploaded files with columns for Date time, User, File name, and Status. The table shows two entries: one successful upload (OK) and one failed upload (Failed).
- Reports:** A section for viewing missing codes reports and reports history.
- Short code errors:** A section for viewing S-C errors files reports.
- Reports history:** A section for viewing missing codes reports history.

Callouts provide additional details for each section:

- Reporting time:** Reminder that shows you current session date.
- Send file:** In this section you can upload file to fill mapping database.
- Safety:** It is important to control time of session.
- Your data:** Here you can download PGP key.
- Language:** You can change language anytime.
- Upload:** Upload mappings.
- Upload history:** Upload mappings from past.
- Reports:** Missing codes reports.
- Short code errors:** S-C errors files reports.
- Reports history:** Missing codes reports history.
- Upload time:** In this column you can check upload time.
- User list:** Here You can see how uploaded files.
- File name:** Uploaded files are listed here. You can track version with this column.
- Status:** This section displays status uploaded files.
- Details:** By clicking one of those icons you can download uploaded report.

At the bottom of the interface, there is a 'WSE support contact' section with an email address (wsparcieUTP@gpw.pl) and a phone number (+48 22 537 73 41). A 'Contact' section asks 'How we can help You?'. A footer note states: 'More details regarding WSE „Short-Long Mapping” you will find in the following specifications :' followed by a list of links:

- GPW WATS 6.02 Short Code Record Keeping
- GPW WATS 6.03 Short-Long Mapper User Guide

6. REPORTING TIME

Files may be supplied:

- a) Only on days on which trading sessions are held,
- b) During the trading days only,
- c) From 17:00 to 19:00 (Warsaw Time) on T day and from 8:00 to 12:00 (Warsaw time) on T day +1,
- d) "Effective date" given in the name of a file equal to T day. Any other date given in the file is not supported and such file is rejected.

Example:

Name of a mapping file supplied from 17:00 on January 3rd, 2017 to 12:00 on January 4th, 2017, "Effective date" should be equal to 20170103 while on the next time interval falling from 17:00 on January 4th, 2017 to 12:00 on January 5th, 2017, "Effective date" should be equal to 20170104.

7. REPORT FORMAT

7.1. FILE FORMAT

file	csv
field separator	comma

7.2. FILE NAME

Name length	15 characters (alphanumeric)
Name structure:	
Trading platform identifier	Values: G - Warsaw Stock Exchange (GPW) B - Bondspot
Exchange member KDPW code (exchange member's technical code in UTP)	4 characters
Effective date	YYYYMMDD YYYY – year MM – month DD - day
Version of a file on the given day	Values from 01 to 99

Example: G04202017111701.csv

7.3. FILE STRUCTURE

	Parameter	Format	Length	Description
1	Short Code	Integer > 9	Up to 10	values between 10 and $2^{31} - 1$ (10 - 2.147.483.647) Reserved values: 0 - 9 for internal use
2	Long Code	String	Up to 50	values: alphanumeric only Natural Person Identifier Legal Entity Identifier Algorithm Identifier
3	Code Type	Integer	1	Value between 1 - 3 4 1 - Client 2 - Investment Decision Within Firm 3 - Execution Within Firm 4 - Non-Executing Broker
4	Identifier Type	Integer	1	Value between 1 - 3 1 - Natural Person 2 - Legal Entity 3 - Algorithm
5	Update Type	Integer	1	Value between 1 - 3 1 - Creation of a new record 2 - Deletion of existing record 3 - Modifying of existing record

8. PGP ENCRYPTION

Files must be encrypted using published by GPW PGP key according to individual requirements of Market when sent to the GPW secure site.

After downloading PGP key every member is obligated to encrypt .csv file with downloaded key, otherwise file will not be processed.

8.1. PGP KEY

PGP key can be found to download underneath member name on the top of short long mapper.

Note: file ready to upload must have .csv.pgp extension! Browsing file is set up to show only .csv.pgp extensions.

9. UPLOADING

9.1. UPLOAD MAPPING FILE

1. Choose the **Upload** section and click **[CHOOSE FILE...]** button.

Date time	User	File name	Status
2024-01-18 11:16:55	artur.kielak@gpw.com.pl	G09992022122102.csv.pgp	✓ OK

2. Choose proper file in Explorer.

Example: `ERRORSXCCCCYYYYMMDD.csv.pgp`, where `X` - trading platform, `CCCC` - exchange member code, `YYYYMMDD` - date of the session with errors.

10. VERIFICATION TIME

Each Exchange Member is obliged to keep mapping database up to date allowing Warsaw Stock Exchange to properly process mapping of Short Code identifiers on current orders entry against Long Code identifiers. Warsaw Stock Exchange will provide Exchange Members with the list of Short Codes that do not have a Long Codes registered against them:

- between 7:01 pm and 7:15 pm on T day,
- at 10:01 on T day + 1,
- at 11:01 on T day + 1,
- at 12:01 on T day + 1.

Note:

Given time is in CET / CEST!

- Missing identifiers reports including list of Short Codes that do not have a Long Codes registered against them. Exchange Member is obliged to supply a mapping file. However it is required to provide missing Long Codes identifiers before 12:01 (end of mapping procedure). After 12:01 mapping file is no longer required.
- Completion report including information about successful completion of mapping procedure. All Short Codes identifiers have a Long Codes registered against them on T day.

Missing Short Code identifiers reports are generated according to the schedule above. After receiving completeness report automatically no further registration process is required. In case an Exchange Member submits any modification to its own mapping database despite receiving a completeness report, the verification procedure will be re-initiated.

System informs WSE member via e-mail about missing short codes. User only receives information that full report is available to investigate it in SLM in **Reporting day timer** section.

When System detect that user do not need to upload missing short codes, then only one report is sent, just to inform that mapping database is complete.

While user uploads file, which modifies short code database, then checking procedure is triggered.

GPW Short-Long Mapper Session expires in 01:59 Adam Debinski (GPW)

11.GPW REPORTS

- a) Each received mapping file is verified to make sure it is not corrupted:
- b) File verification checks:
 - a) upload time,
 - b) report name,
 - c) PGP encryption,
 - d) CSV syntax,
 - e) file content.
- c) Exchange Member receives a response after each file verification:
 - a) File format: csv,
 - b) File name (15 numerical characters + C or E).
- d) GPW report in CSV format is available only when a file passed verification of:
 - a) upload time,
 - b) report name,
 - c) PGP encryption.
- e) GPW Report is available on website and is sent by email. GPW report is sent only when validation passed filename and upload time verification.
- f) Upload time and filename are verified online.

GPW report file name examples:

Exchange Member supplies mapping file: G09042018010201.csv.pgp.

Name of a verification report where file status indicator equal to "E" (file corrupted):
G09042018010201E.csv.

Name of a verification report where file status indicator equal to "C" (file correct):
G09042018010201C.csv.

Consumes	application/json		
Produces	application/json; charset=UTF-8 or text/csv		
Parameter Type	Path	Parameter Name	uid <i>required</i>
Response	CSV when http status = 200 JSON otherwise		

12.7. VALIDATION RESULT (400)

Resource	fileValidationError		
Method	GET	Path	/api/mapping/file/{uid}/,DanaInfo=.asocstgEztvJr1gN41,dom=1,CT=sxml+error
Possible responses	400 – Error uploading file 401 – Unauthorized 403 – Forbidden 404 – Not found		
Consumes	application/json		
Produces	application/json; charset=UTF-8		
Parameter Type	Path	Parameter Name	uid <i>required</i>
Response 400	<pre>{ "status": "string", "error": "string", "error_description": "string", "time": "string", "problems": [{ "error": "...", "error_description": "..." }, ...] }</pre>		

12.8. MISSING REPORTS LIST

Resource	missingReportsList		
Method	GET	Path	/api/missing/,DanaInfo=.as0cstgEztvJr1gN41.dom=1,CT=sxml+report
Possible responses	200 – OK 401 – Unauthorized 403 – Forbidden		
Consumes	application/json		
Produces	application/json;charset=UTF-8		
Response 302	<pre>{ "status": 200, "code": "Missing Codes Reports", "code_description": "List of reports", "time": "2017-12-01 19:01:00", "content": [{ "memberCode": 1, "session": "2017-12-01", "hour": "19:00:00", "exchange": "G", "hasErrors": false }] }</pre>		

12.9. MISSING REPORT

Resource	missingReport		
Method	GET	Path	/api/missing/report/{exchange}/{memberCode}/{date}/,DanaInfo=.as0cstgEztvJr1gN41+[time]
Possible responses	200 – OK 401 – Unauthorized 403 – Forbidden 404 – Not found		
Consumes	application/json		
Produces	application/json;charset=UTF-8 or text/csv		
Parameter Type	path	Parameter Name	exchange (<i>letter example: G</i>) memberCode (<i>integer example: 1</i>) date (<i>yyyyMMdd example: 20171201</i>) time (<i>HHmmss example: 150000</i>)
Response 302	CSV when http status = 200 JSON otherwise		

12.10. LOGOUT

Resource	Logout		
Method	GET	Path	dana-na/auth/logout.cgi
Possible responses	302		
Consumes	application/json		
Produces	text/html		
Response 302	text/html
