4. INTRODUCTION

This document presents a list of GPW WATS Rejection Codes.

This document lists all rejection codes that may be returned by the Gateway in response to messages sent by the Client.

The codes in the following chapter are grouped by the Market Models supported within GPW WATS.

The lists contain only business rejection codes returned by the application layer. The technical session level rejection codes are listed in the corresponding message definitions within protocol specification documents:

- GPW WATS 2.01 Native Order Gateway Specification
- GPW WATS 2.02 FIX Order Gateway Specification.

5. REJECTION CODES

5.1. ORDER GATEWAY

The following table provides the list of rejection codes that may be returned by the Trading Gateway in various scenarios.

5.2. RISK MANAGEMENT

List of rejection codes returned by Risk Management service used for setting risk limits.

Currently Risk Management service is applicable only to Central Limit Order Book trading.

Name	Value	Description
InvalidParty	1	The request failed due to one or more parties involved being invalid. This could be due to incorrect identification or authorization issues.
InvalidRiskLimitType	3	The type(s) of risk limits requested are invalid, possibly due to being unrecognized or not applicable in the given context.
InvalidRiskLimitId	4	The identification numbers for the requested risk limits are invalid, suggesting an issue with how these limits are referenced or recorded.
InvalidRiskLimitAmount	5	The amounts specified for the risk limits are invalid, which could mean they are out of acceptable ranges or not formatted correctly.
InvalidRiskInstrumentScope	7	The scope of financial instruments covered by the risk limits is invalid, suggesting a mismatch with the system's capabilities or settings.
RiskLimitAlreadyDefinedForParty	13	The parties involved already have risk limits defined, indicating a duplication or overlap in the request.
NotAuthorized	98	The party making the request is not authorized to do so.
Other	99	This is a catch-all category for any other reasons not specifically enumerated above.
MissingMicCode	101	MIC value is missing in the risk limit request.
InvalidPartyRoleQualifier	102	There is an incorrect value for the Party Role Qualifier field in the risk limit request.
